

CO₂e Neutrality Plan

Company Profile: We are a leading polymer injection molding company specializing in technologically advanced components for the automotive, medical, and industrial markets. We are a partner for innovation and solutions for our customers.

Target: Our goal is to be CO₂e neutral by 2039. This includes reducing and compensating our greenhouse gas (GHG) emissions in accordance with the standards of the European Union's Greenhouse Gas (GHG) Protocol.

CO₂e-Balance Base Year 2022: Our CO₂e balance is divided into three scopes:

- **Scope 1:** Direct emissions from company processes, building infrastructure and fleet (142.5 t CO₂e, 2.3% of total emissions).
- **Scope 2:** Indirect emissions from the consumption of energy (2,016.9 t CO₂e, 32.6% of total emissions).
- **Scope 3:** Other indirect emissions along the value chain (4,036.6 t CO₂e, 65.2% of total emissions).

Action Plan:

1. **Increase Energy Efficiency:**
 - Optimization of production processes
 - Use of energy-efficient machines and technologies
2. **Use Renewable Energies:**
 - Switching to electricity from renewable sources
 - Installation of photovoltaic systems
3. **Reduce Emissions:**
 - Reduction of energy consumption in buildings
 - Promotion of electromobility in the vehicle fleet (50% of the vehicle fleet electrified by 2032)
4. **Create Awareness:**
 - Training and workshops for employees
 - Publicizing environmental goals and measures
5. **Involve Supply Chain:**
 - Collaborate with suppliers to reduce GHG emissions
 - Sustainability criteria for supplier selection

Results and Benefits:

- **Transformation:** Path to greenhouse gas neutrality by 2039
- **Realizing:** Identification of emission hotspots and risk management
- **Responsibility:** Fulfill requirements and improving the brand image
